(Electives should be chosen based on a student's interests and may include any class that is not part of their core requirements.)

Total Credits: Minimum 22 / Maximum 32

Total Credits: Minimum 22 / Maximum 32

*For information regarding early graduation, pursuit of a high school equivalency diploma, or a Certificate of Completion for students who have completed their high school education but have not met all the academic requirements necessary for a College-Prep or General Studies diploma, please contact our office.

Testing Requirement...

Students enrolled in Daniel 1 Academy are exempt from standardized testing requirements. However, *to qualify for a college-prep diploma*, a student must take either the ACT exam (act.org) or Classical Learning Test (cltexam.com) at least once during their high school years. *To graduate with honors*, a student must also make the following scores on the ACT or CLT exam at least once during their high school years.

ACT: Math (22); Science (23); English (18); Reading (22)

CLT: Quantitative Reasoning (20); Verbal Reasoning (25); Grammar/Writing (25)

SAT: Contact our office if your student prefers to take this exam instead.

*When registering for the ACT, please include D1A's code (430-444). When registering for the CLT, save 25% by using our discount code (daniel125).

*We highly recommend that all high school students, even those not planning to go to college, take one of these exams prior to graduation. Ideally, a student should take the test for the first time in 10th grade to get a baseline score, then try to improve their score by retaking it in 11th and 12th grade. *These scores, up to and including the February test, will determine the class rank for graduating seniors.*

Determining a High School Credit...

One high school credit generally represents 150 hours of learning. There are two ways credits can be earned.

- Complete a published textbook. Whether completed in one semester or more, the student would receive one credit.
- Complete 150 hours of hands-on learning. For learning that does not involve a textbook, parents should keep record of the date, description of work, and amount of time related.

Reporting Grades...

- Please use this link on our website: <https://d1academy.org/submit-grades/>
- Report *specific* subject names, *numerical* grades, and the *amount* of credit earned.
- Report dual enrollment credit the same way, but also provide us with verification from the college or university via an email or screenshot of those grades.
- Once updated, parents will receive a copy of their student's transcript for their records.
